Clear Capital Required Products

- Collateral Desktop Analysis (CDA)²

Clear Capital Escalation Process

- If the CDA returns a value that is \leq 5% of the Appraised Value⁴, the Appraised Value⁴ can be used to establish the LTV.
- If the CDA returns a value that is $>$ 5% but \leq 10% of the Appraised Value⁴, two options are available:
 - 1) The CDA value can be used to establish the LTV/CLTV, however the LTV/CLTV maximum is the lower of the program maximum or 70%, whichever is less.
 - 2) A Clear Capital Broker Price Opinion (BPO) and Clear Capital Value Reconciliation of Three Reports may be ordered. In the case where two Appraisals were required, the two Appraisals and the CDA can be used to the Value Reconciliation of Three Reports. The reconciled value determined by Clear Capital will be used to determine LTV/CLTV.
- If the CDA returns a value that is “Indeterminate” or $>$ 10% of the Appraised Value, a Clear Capital Broker Price Opinion (BPO) and Clear Capital Value Reconciliation of Three Reports must be ordered. The reconciled value determined Clear Capital will be used to determine LTV/CLTV.
- If the Clear Capital CDA returns a value that is greater than the Appraised Value⁴, the Appraised Value⁴ will be used to determine LTV/CLTV.

1. “Full Appraisal” refers to a Uniform Residential Appraisal Report (URAR). This includes a FNMA 1004 and FHLMC 70
2. The Collateral Desktop Analysis (CDA) must include the MLS data
3. The CDA will be completed on lower of the two appraisals
4. The “Appraised Value” is the value determined from the original appraisal(s) obtained by the Lender
